## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated
 by Wang (USPN 6,157,738).

Regarding claim 1, Wang discloses: a data supply device for supplying to an external area data indicating an area in which the at least one sort of image is displayed (Please note, figure 3 in correlation to column 3, lines 55-58. As indicated provided with computer system 310 is display screen 312, such as a color monitor, keyboard 313 for entering user commands, and pointing device 314 such as a mouse for pointing to and for manipulating objects displayed on display screen 312) and

attribute data indicating attributes of the at least one sort of image (Please note, column 3, lines 65-67. As indicated various hierarchical tree structure data corresponding to document pages which have been processed according to a block selection technique. In this regard, one such hierarchical tree structure is explained on column 1, line 52. As indicated attribute data specifying image type, such as text, picture, table etc.).

Regarding claim 3, Wang discloses: an image read unit for reading from an image display member on which at least one sort of image is displayed the image (Please note, column 4, lines 1-2. As indicated a multi-page document may be input by scanner 316); a data read unit for reading area data indicating an area in which the at least one sort of image is displayed and attribute data indicating attributes of the at least one sort of image by using a communication function of the image display member (Please note, column 3, lines 65-67. As indicated various hierarchical tree structure data corresponding to document pages which have been processed according to a block selection technique. In this regard, one such hierarchical tree structure is explained on column 1, line 52. As indicated attribute data specifying image type, such as text, picture, table etc.); and an image process unit for performing an image processing with respect to an image in an area where a predetermined sort of image is displayed in response to the predetermined sort on the basis of the read area data and the read attribute data (Please note, column 1, lines 25-27. As indicated the identification and analysis results are then used to determine a type of processing to be performed on the image data, such as optical character recognition (OCR), data compression, data routing, etc.).
